

We are now hiring

Green Maritime Technology - GMT provides marine engineering & naval architecture services, focusing on new technology & innovative solutions, for vessels to comply with international environmental regulations.

GMT is a fast growing Greek company and provides a creative, challenging and dynamic multinational environment. We encourage team spirit, development via learning and career perspectives.

Our team is growing and currently we are seeking for:

Naval Architect, Marine Engineer based in Glyfada - Greece.

This is a great opportunity to work with our technical department on engineering projects for high end companies in maritime industry.

At the same time, you will have the chance to travel abroad for on-board, project based, engineering surveys and meet the practical aspects of your scope of work.

Key Skills:

- Good knowledge of 2D & 3D CAD software.
- Knowledge of any CAE software will be considered as an advantage.
- Ability to travel abroad & undertake on-board surveys.
- Fluent writing - speaking communication skills in English language.
- Organizational & project management skills.
- Responsibility & focus on quality of deliverables.
- Excellent communication and interpersonal skills.

Essential criteria:

- University Degree in Naval Architecture, Marine Engineering
