

## Technical Project Manager (VN-2018-003)

**WE'RE  
HIRING!**

*Do you enjoy being part of projects creating new technologies?  
 Do you like getting involved in transforming research into products?  
 Do you want to create global impact by delivering high-tech results to international customers and partners?*

Adamant Composites Ltd is an industrial SME working on high-tech applications of Advanced Materials and Structures supporting our International Customers with design, manufacturing and new technologies for their products. We are a dynamic Small Company based in Patras, Greece, offering our employees state-of-the-art engineering projects, flexible working hours, and stable working environment in a competitive package. Since 2012 that the company started we have been growing, eventually creating a team of 15 engineers and technicians.

*We offer a dynamic working environment, with challenging engineering projects and international exposure!*

### Position Profile:

For Running and New National and International projects, we seek to expand our Team with a **Technical Project Manager**, with expected start date **January 2019**.

#### • “Must Haves”

- ✓ Dipl.-Ing. Or MSc in Mechanical / Chemical / Materials Engineering
- ✓ Fluency in English: understanding, speaking, writing in project management
- ✓ 1-3 years of experience in R&D project work and/or management
- ✓ Leadership experience, problem-solving skills and strong teaming abilities

#### • Technical Experience and Competences needed:

- ✓ Background on Composites, Polymer processing, and/or Nanotechnology
- ✓ Hands-on experience with Composites Processing and Manufacturing
- ✓ Experience in project reporting for EU, H2020 or National Projects

#### • “Nice to Have” competences:

- ✓ Experience in the end-to-end completion of a Product development project
- ✓ Hands-on experience with design and implementation of hardware setups
- ✓ Transforming Ideas into Projects (e.g. input for proposal preparation)
- ✓ Certified project management training

#### • Practical experience that would be greatly valued:

- ✓ Product definition and Technical Feasibility assessment
- ✓ Product to Market Roadmap development
- ✓ Experience with Project Management tools
- ✓ Proposal setup and/or coordination

#### Responsibilities:

- Daily management of projects
- Reporting to management on status and planning
- Setting and achieving project milestones
- Communication and coordination with projects partners
- Providing and requesting input to/from partners
- Planning and follow-up of internal actions and resources for the projects
- Organizing and managing internal implementations of research on the Production Lines
- Coordinating procurements for the project
- Preparing deliverable items for on-time submission
- Contributing to preparation of workshops & dissemination events
- Contributing to proposal development with ideas, content and management tasks
- Participation in project meetings and travelling for company representation in dissemination events
- Plan and implement steps in Product development

This Position reports to the Managing Director.

**Location:** The position is based in Patras, Greece. A great place to live with young and vibrant people, close to the Sea and Mountains, and lots of accessible opportunities for personal development in a relaxed manner.

### Why Should You Apply? If you want...

- Full-time employment in exciting and stimulating interdisciplinary research/engineering projects
- Opportunities for on-the-job training and exposure to advanced manufacturing activities
- To make an impact through a Small and Dynamic company

**Application process:** Send your CV and a short cover letter via e-mail to: [info@adamant-composites.gr](mailto:info@adamant-composites.gr)

Following the evaluation, only successful applicant will be contacted.
