

Saint-Gobain Research Germany near Aachen is looking for a motivated employee at the earliest date possible as

V.I.E. Development Engineer Virtual Reality and Digital Imaging (m/f/d)

Your tasks

- › Applying Virtual Reality and Digital Imaging (VR & DI) technologies with state-of-the-art software tools and bringing it into various applications for virtual product & process development within the Saint-Gobain group, making use of physical-based rendering
- › Building-up a tool for virtual validation used in co-developments & virtual product development together with partners and customers (UX/agile design approach)
- › Prepare design models for VR & DI presentations, installations and studies
- › Scouting, monitoring and consulting activity on VR & DI technology trends and technology infrastructure for a Saint-Gobain R&D centre (Software, Hardware, measurement technologies)
- › Find new applications and solutions for VR & DI together with other departments (e.g. production, marketing, FabLab), R&D projects and external partners (e.g. Universities)

Your profile

- › University degree in natural sciences, engineering, design or equivalent (M.Sc./Eng.)
- › Highly interested in VR & DI and other cutting edge technologies
- › Prior knowledge in 3D CAD design or programming is favorable, but not mandatory
- › Being free-minded and keep innovative thinking for bringing together state-of-the-art virtual technologies and new applications
- › Self-driven and motivated team-player, willing to cooperate with internal and external partners within an international environment
- › Very good command of spoken and written English, German is a plus

About the V.I.E. program

The V.I.E. carries out his/her assignment in a French company operating overseas. Interns can work in a variety of domains.

- › The latest your assignment can start is on the day of your 29th birthday. No exceptions can be made.
- › You must have European nationality (i.e. be a national of a Member State of the European Economic Area, which includes the 28 Member States of the European Union including Norway, Iceland, Lichtenstein and Monaco)
- › For more information concerning the V.I.E. program please visit www.civiweb.com

We look forward to meeting you!
