

Why am I doing this? Because I can.

VOXELGRID wants YOU

To support our team, we are currently looking for:

Data Annotator (m/f)

We are:

VOXELGRID is a fast-growing startup of the well-known CalCon group located in Munich, Germany. Focusing on 3D modelling of buildings and urban environment, we analyse multiple data sources and create realistic representations.

Mission of role:

You will help annotate remote sensing data for use within a machine learning engine that analyses massive datasets and extracts products that impact multiple sectors of the real estate market.

You will:

- annotate and label remote sensing data
- provide qualitative feedback
- collaborate with the research team for more efficient labeling

You should:

- be able to learn in a fast-paced environment
- be efficient and accurate in repetitive tasks
- have high standards for attention to detail
- have strong sense of self-motivation and ability to work independently
- be interested in remote sensing or machine learning (a strong plus)
- own a private computer

What we offer:

- flexible working hours; university students are welcome; work from home-office location
- chance to work with the real experts
- chance to take part on a really unique project
- chance to gain precious experience in machine learning
- contact points and training in Athens

Interested?

Then please contact Charoula Andreou: c.andreou@calcon.de
