

qmetric | HR & Career Solutions is currently recruiting, on behalf of [Epignosis LLC](#), the position of

Front-end Developer

The company

Epignosis LLC is a rapidly growing and profitable technology company with offices in US, UK and Greece and an established line of learning management tools that can cover a variety of customer needs. It builds products to solve training problems of growing companies. Its portfolio includes [eFront](#), an award winning LMS for enterprises and [TalentLMS](#), a lean, cloud LMS for everyone that needs a really fast and simple way to train online. They are also working on an exciting new mobile product, named [TalentCards](#), that combines aspects of microlearning, infographics and gamification. You can find more info about the company and its values [here](#).

The position

We are looking for a Front-End Web Developer who is motivated to combine the art of design with the art of programming. Responsibilities will include translation of the UI/UX design wireframes to actual code that will produce visual elements of the application. You will work with the UI/UX designer and bridge the gap between graphical design and technical implementation, taking an active role on both sides and defining how applications look as well as how they work. Your main duties will include:

- Use markup languages like HTML to create user-friendly web pages
- Maintain and improve our front-end websites
- Optimize websites and applications for maximum speed
- Collaborate with back-end developers and web designers to improve products usability

Your profile

In order for you to be able to successfully carry out the duties of the job, you should possess the following:

- Proven work experience as a Front-end developer
- Proficient understanding of web markup, including HTML5 and CSS3
- Proficient understanding of Wordpress
- Good understanding of server-side CSS pre-processing platforms, such as LESS and SASS
- Good understanding of client-side scripting and JavaScript frameworks, including jQuery

- Good knowledge of image authoring tools, like Photoshop
- Good understanding of cross-browser compatibility issues and ways to work around them
- Good understanding of code versioning tools, such as GIT
- Good understanding of SEO principles and ensuring that application will adhere to them
- Excellent analytical and multitasking skills
- An ability to perform well in a fast-paced environment
- Ridiculous attention to detail

Our Client offers

In case you are selected for the position of the Front-end Developer, you will have access to the following:

- A vibrant environment full of interesting people
- Better-than-market salary
- Ample personal growth opportunities
- Healthcare program
