

We're Youp, a tech company that is founded with a mission to change the traditional way of online shopping by offering pioneering services and high class shopping experience. That means building and consuming API's, dealing with high-throughput and large datasets and doing smart processing for all of it. And we, of course, also have to offer a smooth mobile and a reliable web application for our clients.

Development of the product will kick off and continue over the years to come and your role in Youp will be decisive. We want to make smart use of technology and to keep up with the latest technologies but also be able to move fast. We care about quality and doing things the right way from the beginning.

Job Description

We are looking to hire a React Developer to join our front-end development team. In this role, you will be responsible for developing and implementing user interface components using React.js concepts and workflows such as Redux

Qualifications

- In-depth knowledge of JavaScript, CSS, HTML
- Knowledge of REACT tools including React.js, Redux
- Experience with user interface design
- Able to develop SPA (Single Page Applications) consuming server-side JSON restful services
- Good understanding of Git and code review process
- Strong communication and interpersonal skills are an absolute must
- Good problem-solving skills

Optional

- Experience in Symfony framework
- Experience in use of major cloud provider (like AWS)
- Knowledge of Docker with its tools
- Knowledge of CI/CD best practices and automated testing
- Experience in distributed architectures/systems

If you're interested to be part of Youp's journey to success, don't hesitate to **send us your CV to youpstartup@gmail.com**
