

Ran Planning & Design Engineer

Municipality of Pallini, Attica, Greece
Design and Engineering
Full time

Description

VICTUS Networks is a Mobile Network Sharing Company created by the joint venture of Vodafone Greece and Wind Hellas. Company's main objective is to manage the Radio Access and Transport Networks (RAN) of its parent companies and, in parallel, implement a partial active radio network sharing (MORAN) for the 2G & 3G & 4G & 5G technologies mostly in rural and in selected urban areas of Greece.

In VICTUS Networks we create cooperative, win-win Cutting-Edge Solutions to deliver top quality networks and empowering our shareholders to compete successfully in the converged market.

To deliver on our vision we need people with strong team working skills, who care passionately about our success. Team up with VICTUS Networks and take the exciting opportunity to be a member of the Design & Engineering Team.

The job holder will be reporting to the RAN Planning & Design Manager and will be responsible for radio network planning, optimization and performance monitoring.
