Blockchain Developer (BCD1811)
https://www.eworx.gr/?i=eworx.en.careers.423

Description of position

You will join our in-house web development team creating and maintaining blockchain-based distributed applications. In this role, you will work together with backend developers, graphic designers and project managers.

Typical Responsibilities

- Assessing technologies, building and maintaining Blockchain-based distributed applications (DAPPS).
- Deploying and monitoring solutions on testnets and production.
- Working with analysts, UX designers, developers, analysing project requirements and mockups.
- Testing cross-browser and cross-platform compatibility for inconsistencies.
- Resolving technical issues through debugging, research and investigation.
- Coordinating with team members; giving and asking for help.

Requirements (generic):

- BS/MS degree in Computer Science, Engineering, Mathematics or a related subject.
- Strong written and verbal technical communication skills; ability to explain and document problems and solutions.
- Ability to engineer software using principles.
- Strong web development experience.

Requirements (specific):

- Strong knowledge of Blockchain and cryptography concepts and principles.
- In-depth knowledge of a Blockchain application framework (e.g. Ethereum Solidity, Hyperledger Fabric).
- Strong knowledge of tooling (dev tools).
- Good familiarity with Javascript.
- Knowledge of agile development principles and unit testing code.

The following will be considered a strong plus:
- Working knowledge of a JavaScript framework (e.g. React, Vue, Angular).
- Working knowledge of a mobile app development platform.
- Adequate knowledge of a server side technology (Java, Node.js, PHP or RoR).
- Adequate knowledge of a database (MySQL, PostgreSQL or any NoSQL).

Benefits

- Competitive salary.
- Opportunity to work in high-profile, international projects.

- Continuous education and knowledge exchange.
- Friendly and stimulating environment.
- Career path.
- Private Health Coverage.
