SHAPING THE FUTURE OF INTELLIGENCE.

DevOps Engineer

Reference: PLTD-DO-2018-02 | Limassol (Cyprus)

Your tasks

As a DevOps Engineer you participate in the implementation of a product platform for the automated interception, analysis and visualisation of radio signals.

You will take over the following tasks and responsibilities:

- Close collaboration with software developers in an agile environment to build, deploy and test software components.
- Manage and monitor tools for continuous builds and integration
- Set up and maintain complex integrated test systems using hardware (sensors) and software
- Automate manual processes using tools and scripts
- Administration of the IT infrastructure

Your profile

- Degree in computer science, electrical engineering or comparable skills
- Good experiences in the areas of DevOps
- Ability to code and script
- Required skills in Build Tools (Jenkins, Bamboo etc.)
- Knowledge desirable in:
    - Deployment tools (Puppet, Foreman)
    - Administration of Linux and Windows systems
    - Network (VLAN, Cisco) and server configuration
    - Virtualization (KVM, VMware, Docker)
    - Databases, preferably Oracle
- Fluent in spoken and written English

Interested? Apply now!

We look forward to receiving your application in English. Please send your documents incl. Ref.-Number to careers@plath.com.cy

Who we are

PLATH Ltd is part of the PLATH Group, a powerful network of medium-sized high-tech companies and one of the leading international providers of high quality systems in the field of communications intelligence. In Limassol we develop sophisticated software solutions for intelligent processing of sensor data, as well as the automation of complex processes of investigation.

Great reasons for working with us in the future

- working together with great colleagues in a growing team
- witness the results of your efforts hands-on
- exciting and challenging work environment
- position in a company with growth potential
- stable foundation from being a member of the PLATH Group
- attractive remuneration package
- private health insurance
- continuous personal development and training opportunities
