

Scientific Investments – Junior Software Engineer

We are looking for a full-time junior software engineer to join a research trading team based in Athens. We have cutting-edge expertise in algorithmic trading and work closely with select well established international clients. We have no exposure to Greek clients or markets, so we provide a challenging but safe professional environment with an international outlook.

We require good knowledge in two of the following languages:

- C/C++,
- SQL
- Matlab

In addition, we value the following:

- Strong academic background (top 10%) in Computer Science or Electrical Engineering; alternatively, extensive programming experience coupled with an academic degree in Physics, Engineering or Statistics/Econometrics.
- Ability to work with and refine other people's code
- Quick learner / strong numerical skills

Salary will be excellent (commensurate with experience) and work will be at the cutting-edge of an extremely dynamic industry with excellent career prospects. For further details, please send CV to christos.hantzis@scientificinvestments.com
