We always invest in our people's growth and we have achieved to create and sustain a supportive environment, which embraces diversity and encourages openness, teamwork and loyalty.

With us, you will have the opportunity to work on innovative projects and technologies, in a fast-paced international business environment, while developing your skills and competencies to achieve your personal goals and career aspirations.

Software Developer

Responsibilities

- Build web applications using Angular as UI framework and .Net Core restful API's as server technology
- Investigate technologies and libraries and implement Proof of Concepts under the direction of the Software Architect
- Participate in the design of new products and features during sprint plannings
- Deploy to Azure through our CI model, or do it manually on on-premises environments
- Track down and resolve internal / UAT / production issues

Requirements

- BSc/MSc in Computer Science, Engineering
- Strong familiarity with web apps, mainly in Angular 4-5
- Excellent coding skills in C# with strong knowledge on latest .Net Frameworks (4.7.1 / .Net Core 2.0)
- Experience with VS 2017, Azure, VSTS. Familiarity with integration / functional / UI Automation testing is a plus
- Good understanding of OOP. Knowledge of software design patterns will be highly appreciated
- Drive for results and customer focus. We need to serve our customers the best possible experience from UI to deployment
- Sense of ownership in your work
- Strong team player with excellent communication skills

All applications will be processed in strict confidentiality. If interested, please send your resume to hr@printecgroup.com.
