## (Junior) Agile Tester

Reference: PLTD-T-022018 | Limassol (Cyprus)

### Your tasks

As QA Tester you participate in the implementation of a product platform for the automated interception, analysis and visualisation of radio signals. Within your agile development team, you will

- make sure together with your colleagues that the delivered product increments meet the high quality standards
- help to write good user stories and testable acceptance criteria
- provide suitable test ideas and support work on testability
- manually execute tests early, context driven, exploratory and follow your test ideas
- write automated acceptance tests
- know when good is good enough and present results quickly and customer-oriented
- work on the continuous improvement of agile testing processes together with the testers of the other teams

### Your profile

You graduated with a degree in information technology or a comparable field and bring, besides team-oriented way of working, the following experiences and knowledge:

- Test case design
- Bug tracking and testing tools
- Basic understanding of object oriented programming
- As Tester you are familiar with concepts like vertical slicing and acceptance test automation
- Ideally, Agile methodologies like SCRUM or Kanban
- Ideally, CAT or ISTQB (CTFL) certification (or interest to achieve it)
- Fluent in spoken and written English

### Interested? Apply now!

We look forward to receiving your application in English. Please send your documents incl. Ref.-Number to [careers@plath.com.cy](mailto:careers@plath.com.cy)

PLATH Ltd  
Kifisias 1 street | 4003 Limassol (Cyprus)  
[www.plathgroup.com](http://www.plathgroup.com)

### Who we are

PLATH Ltd is part of the PLATH Group, a powerful network of medium-sized high-tech companies and one of the leading international providers of high quality systems in the field of communications intelligence. In Limassol we develop sophisticated software solutions for intelligent processing of sensor data, as well as the automation of complex processes of investigation.

### Great reasons for working with us in the future

- working together with great colleagues in a growing team
- witness the results of your efforts hands-on
- exciting and challenging work environment
- position in a company with growth potential
- stable foundation from being a member of the PLATH Group
- attractive remuneration package
- private health insurance
- continuous personal development and training opportunities
