

qmetric | HR & Career Solutions is currently recruiting, on behalf of [Epignosis LLC](#), the position of

DevOps Engineer

The company

Epignosis LLC is a rapidly growing and profitable technology company with offices in US, UK and Greece and an established line of learning management tools that can cover a variety of customer needs. It builds products to solve training problems of growing companies. Its portfolio includes [eFront](#), an award winning LMS for enterprises and [TalentLMS](#), a lean, cloud LMS for everyone that needs a really fast and simple way to train online. They are also working on an exciting new mobile product, named [TalentCards](#), that combines aspects of microlearning, infographics and gamification. You can find more info about the company and its values [here](#).

The position

As a DevOps Engineer, your responsibilities will include configuring and using cutting edge tools and processes to streamline the deployment, automation, management, logging and monitoring of our SaaS environment. This also includes the development and production of Epignosis' infrastructure, platform services and applications. Your main duties will include:

- Manage Epignosis cloud infrastructure over Amazon and Rackspace
- Ensure maximum uptime for our SaaS infrastructure
- Monitor and alert based on system metrics, analysis of logfiles and custom alert rules
- Collaborate with the development team around products deployment, security and availability
- Propose, compare and evaluate different infrastructure options and service deployments.

Your profile

In order for you to be able to successfully carry out the duties of the job, you should possess the following:

- Strong background in Linux/Unix Administration
- Strong experience with cloud providers like Amazon AWS and Rackspace
- Strong experience with Apache and Mysql
- Experience with tools like Nagios, Elastic Stack and Docker
- A working understanding of code and script (PHP, Python, Perl and/or Ruby)

- Knowledge of best practices and IT operations
- Experience with micro-services architecture and message brokering (e.g. rabbitmq) will be considered a plus
- Experience with IPS/IDS will be considered a plus
- Critical thinker and problem-solving skills
- An ability to perform well in a fast-paced environment
- Team player.

Our Client offers

In case you are selected for the position of the DevOps Engineer, you will have access to the following:

- A vibrant environment full of interesting people
- Better-than-market salary
- Ample personal growth opportunities
- Healthcare program
