qmetric | HR & Career Solutions is currently recruiting, on behalf of **Epignosis LLC**, the position of

Quality Assurance Engineer

The company

Epignosis LLC is a rapidly growing and profitable technology company with offices in US, UK and Greece and an established line of learning management tools that can cover a variety of customer needs. It builds products to solve training problems of growing companies. Its portfolio includes **eFront**, an award winning LMS for enterprises and **TalentLMS**, a lean, cloud LMS for everyone that needs a really fast and simple way to train online. They are also working on an exciting new mobile product, named **TalentCards**, that combines aspects of microlearning, infographics and gamification. You can find more info about the company and its values **here**.

The position

This position is for Quality Assurance Engineer to develop and execute exploratory and automated tests to ensure product quality. Your main duties will include:

- Create detailed, comprehensive and well-structured test plans and test cases
- Estimate, prioritize, plan and coordinate testing activities
- Design, develop and execute automation scripts using open source tools
- Identify, record, document thoroughly and track bugs
- Perform thorough regression testing when bugs are resolved
- Develop and apply testing processes for new and existing products to meet client needs
- Liaise with internal teams (e.g. developers and product managers) to identify system requirements
- Monitor debugging process results
- Track quality assurance metrics, like defect densities and open defect counts
- Stay up-to-date with new testing tools and test strategies.

Your profile

In order for you to be able to successfully carry out the duties of the job, you should possess the following:

- BSc/MSc degree in Computer Science, Engineering or a related subject
- 3-4 years work experience in software quality assurance
- Knowledge of software QA methodologies, tools and processes

- Experience in writing clear, concise and comprehensive test plans and test cases
- Hands-on experience with automated testing tools (e.g., Selenium)
- Passion for testing and breaking software
- Excellent knowledge of English language

Our Client offers

In case you are selected for the position of the QA Engineer, you will have access to the following:

- A vibrant environment full of interesting people
- Better-than-market salary
- Amble personal growth opportunities
- Healthcare program
