Job Description

CCS Digital Education is seeking a Software Engineer to join our team in Athens and help us with the evolution of our SaaS eLearning platform.

We're looking for professionals with intelligence, insight and attention to detail, willing to go over and above so our common goals are met.

By joining us you'll get countless opportunities for personal and professional development. We offer a lively working environment where teamwork, creative thinking, dedication and hard work are the core of our culture.

Key Knowledge & Skills

- Experience working with Java Enterprise Edition, Web frameworks, HTML/CSS and multi-tiered Java applications.
- Working knowledge of Spring Framework, Hibernate, REST, Agile (Scrum).
- Firm grasp of software development lifecycle best-practices, methods, and conventions, including but not limited to Unit and Integration Testing, Source Code Management, Continuous Integration, Domain Driven Design, and Dependency Management
- Strong project management skills and the ability to multitask in a cross-functional environment.

Qualifications

- Bachelor's degree in Computer Engineering or Computer Science
- At least 3 years of experience working with Java Enterprise Edition, Web frameworks and multi-tiered Java applications.
- Excellent English speaking and writing abilities.
