

Software Consultant

i2s is seeking for highly driven, self-motivated, adaptable and resourceful individuals who will be great additions to an already dynamic, motivating and evolving environment in order to promote, sell, design and deliver innovative software solutions that result in significant improvements in our clients' performance. We need the candidate to be fast and flexible and to know or to be willing to learn what has to be done to meet our customers' needs.

i2s is asking for your best performance and in return is offering continuous training and development, the opportunity to get involved with new technologies, a valuable professional experience and a competitive remuneration package tailored to the applicant's seniority and qualifications through a challenging and fun to-work-in international environment.

Description

After being trained in a specific software / solution and become an expert in it, you will be expected to:

- Assist in the implementation of the software, in close cooperation with the customer team. This work includes all the necessary steps from implementing systems, understanding customer processes, collecting the data needed from customization to training and "go-live".
- Ensure that the customer has the maximum benefit from the application and is satisfied with its use. Recording and following customers' requests and ideas for new features or enhancements
- Support our customers, from simple answering questions to much more complex tasks such as data mining with data mining tools
- Produce content for successful projects that will later be published in social media or presented in conferences
- Participate in exhibitions and conferences all over the world
- Work closely with our Product Development team for the design & implementation of new features & services

Requirements

- University degree in Computer Science or Business studies will be an asset
- Excellent oral and written communication skills both in Greek and English language
- Ability to travel worldwide to meet customers
- The right candidates should be:
 - Professionals who are eager to learn and who apply both solid judgement & an open-minded approach when researching solutions
 - Self-motivated individuals with strong analytical thinking and problem solving skills
 - In position to broad understand information systems
 - Eager to build interpersonal, team, and cooperative skills

Candidates with the above competencies should send their CV at xpapadimitriou@i2s.gr, referring the position **Software Consultant (Code: SC-SC)**
